

Business Portfolio

The Business Portfolio product range is designed to give you and your clients a simple solution in the small business package arena.

Competitive product range

We offer a range of solutions through our Business Portfolio range that today's customers demand by offering wide basic cover as standard with the ability to add on optional extensions depending upon their requirements.

Packaged insurance solutions

Brokers requirements are important too. So Business Portfolio has been designed to meet brokers' needs in this fast paced business environment. We have built a back office system that understands the day to day requirements of an insurance broker and where possible have widened our underwriting criteria to give an answer first time. However we recognise that it is not possible to cover every situation; that's why we have a team of underwriters available to discuss your requirements.

Reduced administration

In this business arena many risks can be low in premium but still require the same level of expertise and administration as those risks associated with much higher degree of underwriting detail. That's why we've developed a system that takes away much of the administration thus freeing up your time.

By only asking the essential underwriting questions we are able to provide a decision in a matter of minutes, and by providing you with clear and concise underwriting criteria we can reduce the number of referrals, thus saving you time and money.

Commercial legal expenses as standard

All of our products within the Business Portfolio range offer commercial legal expenses as standard, thus giving your customers this additional safeguard automatically at no extra premium.
